

# Upholding Ethical Standards in Teaching

The short film addressed the ethics of the teaching profession and delivered its marks. The attorney in the film provided examples and an overview of the obligations teachers have in their profession. He emphasized the requirement that teachers uphold higher moral and decent values in the education system, stating, "There is no duality of morality." Simply put, this means that educators' attitudes and behaviors, whether in or out of the classroom or school, must be above reproach and cannot tarnish the education system. Teachers should set an excellent example for their students by preserving moral standards in all aspects of their lives, not just on campus. By demonstrating integrity and professionalism in both their professional and personal conduct, teachers can strengthen the educational system and positively influence their students.

I concur with the presumptions that have been stated. Educators do, in fact, play a vital part in helping learners build strong moral character because of their immense ability to impact their ambition, thinking, and intelligence. They significantly contribute to establishing their ethical values, making moral education essential. Students, especially young individuals, are still in the learning phase, and it's probable that this makes them believe their observations from their teachers are normal. Students require assistance in order to think from others' perspectives and assist others. They might also benefit from understanding their life's purpose and the kind deeds they must perform for others in society.

The film also highlighted the broader societal impact of teachers' conduct. When teachers exemplify strong moral principles, they not only guide students in the right direction but also contribute to creating a more ethical and just society. The role of teachers extends beyond academic instruction; they are pivotal in shaping the future citizens of the world. This profound responsibility underscores the importance of maintaining ethical standards in all aspects of a teacher's life.

As a future educator, I will indeed impart my love of teaching and work to set a positive role model for my students. I will not take any actions that will reflect poorly on me as a future educator and in the education system. I aspire to leave a lasting impression as a teacher who encouraged students to develop virtues like empathy, respect, kindness, and humility.

Furthermore, I understand the importance of continuous self-reflection and professional development. Staying informed about ethical guidelines and best practices in education will help me navigate the complexities of teaching with integrity. By fostering an environment of respect and trust, I hope to inspire my students to not only excel academically but also to grow into compassionate and responsible individuals.

In conclusion, the short film underscores the crucial role of ethical conduct in the teaching profession. Teachers are more than just educators; they are role models who shape the character and values of their students. By upholding high moral standards, teachers can profoundly influence their students' lives and contribute to a better society. As I prepare to enter the teaching profession, I am committed to embodying these principles and making a positive impact on my future students.
